A NEWSLETTER FOR EQUITY HOLDERS OF TRT

Vol. 35 / December 2015

WEBSITE RELAUNCH

With the help of our first ever intern, our website has been totally redesigned. In one location you can now find all of our publications and research, marketing material, news releases and newsletters, service manuals and troubleshooting guides, investor information and financials, testimonials and so much more.

Visit www.trtlc.com

We are also using Facebook and twitter to drive people to the site and we have averaged 600 hits per week.

TRT IS MOVING

After nearly ten years in the same office park, a recent foreclosure has offered

us the opportunity to relocate to nicer facilities located closer to more Woodstock businesses and to reduce rent nearly 30%. The new address is **251 Heritage Walk, Woodstock 30188**. We hope to be in the new facility no later than the first week of January. Come see us!

2016 FINANCES AND STRATEGIES

After developing our 2016 preliminary budget, it is anticipated that we will require \$250,000 in additional financing to execute our business plan. This amount is the amount required to utilize external consultants to make our FDA filings for nonunion fractures and for a 510K for a pain pathology or something else that we can file with the FDA division with whom we are now dealing. Outside of the external consultants we anticipate being cash flow neutral in 2016; this is quite

compelling considering Sanuwave anticipates a \$300,000 per month loss in 2016. Based upon recent meetings with FDA we anticipate great progress in 2016. A sale or merger in this period is also quite possible. To raise the \$250,000 we are selling \$0.50 shares and a prospectus can be found in the investor link on the homepage. The password is 1234. Please call if I can answer any questions (404-402-6844). We are also researching Crowd Sourcing as a way to raise money to execute the next two years or until we finally obtain FDA Clearance, registration or approval.

CRT UPDATE

Several TRT shareholders are also CRT shareholders. TRT has agreed to extend the TRT options for CRT shareholders until 12/31/16. An amazing article was published last month in the Journal of the American Heart Association that showed that the nearly 15% of heart bypass pump patients who develop paralysis as a result of surgery may be able to prevent total paralysis by applying shockwaves during or immediately after surgery. This is a critically important research project published at the highest level. Please go to the TRT Homepage and read the whole article. We believe the article lays the foundation to treat all spinal injuries immediately to greatly reduce the risk of permanent paralysis. We are working with partners who can make this happen soon.

This newsletter is not an offer to sell or solicitation of an offer to buy TRT securities. Investment decisions should be based on the risks and disclosures presented in TRT's Confidential Memorandum. This newsletter contains forward looking statements within the meaning of the federal securities laws. Forward looking statements are only predictions and not guarantees of performance. You should not place undue reliance on any forward-looking statements.

ERECTILE DYSFUNCTION

We are working with one of the world's largest providers of ED therapy to develop protocols to incorporate our therapy as part of the standard of care. We delivered a unit and began treating patients in November in Colombia, South America. Feedback from two other centers is very compelling and we think this pathology offers great potential.

DRINK UP!

As an homage to our German roots, and based on our recently issued patent, we have engaged a local beer brewer to incorporate SoftWave technology into the brewing process. Two goals: one, we can increase the release of flavonoids and oils from the hops to improve flavor or reduce the required amount of ingredients in each batch; or two, we can improve the performance of the yeast to make a more potent brew. We hope to have a blind taste testing in January and we will invite any local shareholders to attend. If it is good, we will bottle some and offer it to our faithful shareholders. We are looking for names if you have any thoughts. My first idea (legal trouble for sure) Shocked Hops! Thunder Beer was also thrown out for consideration. Our first coffee drink has already been named Shocka Latte!

Seasons Greetings
