A NEWSLETTER FOR EQUITY HOLDERS OF TRT

Vol. 37 / August 2016  
Woodstock, GA

## *In Memoriam*

It is with great sadness that we announce the death of Dr. Richard Thiele, cofounder of both TRT and our international shockwave society, the ISMST. Richard, an exercise enthusiast passed enjoying one of his passions, running alone on a nature trail. This was quite unexpected as Richard was one of the fittest within our shockwave society, and he actively managed his stress and lived life to the fullest. He loved a glass of wine and his family, friends and colleagues - and his vacation home in Portugal. As the Director of Industry for the ISMST, Richard had the tedious task of managing the conflicting wants and needs of an industry that really enjoyed fighting amongst themselves. Only Richard could leave the participants of the annual meetings smiling. Richard was born in 1954 and is survived by his wife and best friend Eva, and his children Segej and Lina. We will all miss Richard and I hope we will all rededicate ourselves to establishing his beloved technology as the international standard of care for the simplest aches and pains and the most advanced lifesaving pathologies. I cannot imagine next year's ISMST meeting in San Sebastian, Spain without him.

*Dr. Richard Thiele*

## Research Notes

We are honored that world renowned clinician and researcher Dr. Daniel Shoskes from the Cleveland Clinic has initiated three IRB approved clinical trials. To the best of our knowledge, two of the trials are for the first ever treatments for Chronic Pelvic Pain Syndrome and Orchialgia (inflamed spermatic cords). A third trial for Erectile Dysfunction has also initiated. The first patients have been treated and we are eager to hear the results after the 20<sup>th</sup> patient has been treated and evaluated and the data published. Details of the studies can be found at [ClinicalTrials.gov](http://ClinicalTrials.gov).

Boston Medical has also initiated an Erectile Dysfunction clinical trial in Colombia, SA. The details can also be found at [ClinicalTrials.gov](http://ClinicalTrials.gov) (NCT02683044). Patient enrollment should be completed before year end. This is obviously a very promising indication as there are about 20 studies underway or completed that can be found on this website. Boston Medical is one of the largest providers for men's sexual health worldwide.

Vol. 37 / August 2016

## Eagles and Grizzlies

We are pleased to report that we were invited to treat several retired professional football players this quarter as well as several current players with the NBA's Memphis Grizzlies. We have now treated over 60 professional basketball players successfully and continue to get referrals as word spreads fast within the NBA and NFL communities.

## G.A.R.M.

I was lucky enough to personally deliver a device to the gorgeous Honduran island of Roatán to the **Global Alliance for Regenerative Medicine**. This stem cell clinic was the most professionally operated center that I have ever seen. It is led by Dr. Glenn Terry and includes on staff world renowned orthopedic surgeon Dr. James Andrews. In addition to sports pathologies, our SoftWave device will be used in combination with their patented stem cell therapy to offer the best possible outcomes for many destructive indications including chronic obstructive pulmonary disease (COPD) and spine trauma. Their facility is in an idyllic beachfront community surrounded by million dollar homes overlooking the Caribbean. The food was amazing and the views are some of the best I have ever experienced.

## New Opportunity

We have spun off the spinal cord injury division to Samaritan's Road International, led by esteemed Atlanta native and businessman Ross Mason. Ross, having personally suffered a complete spinal cord injury years ago and having personally benefitted from our technology, is eager to accept the responsibility to raise the funds necessary to complete a clinical study and present the data to the FDA for approval. TRT shall remain a substantial shareholder in this company and earn future royalties as well. Ross Mason's team and investors are ideally suited to accelerate this project to completion to offer our services to the hundreds of thousands of spine injury patients.

San Sebastian, Spain

## ISMST

Next year's meeting is in San Sebastian, Spain. I have been told that San Sebastian is an amazing local town, famous for food, beach, and weather. Some of the world's greatest restaurants can be found here. Just look at the picture! I encourage everyone to attend. Based on our current regulatory timeline, we should be very close to 510K clearance at this time adding more excitement and pleasure to TRT shareholders and friends.
